

# LENSEC Honors Texas School District Police

## Leading security software provider sponsors conference dinner

*"We are happy to provide an opportunity for everyone to share ideas in a relaxed setting, and hopefully, have a little fun."* **said David Crawford**

**Houston, July 21, 2010** – LENSEC, an industry pioneer in IP-based video surveillance solutions, is sponsoring President's Night Out at the 14th annual conference of the Texas School District Police Chiefs' Association. The BBQ dinner, raffle and live music event is July 22 at the historic Floore Country Store in Helotes, Texas.

*"As partners in school safety and security, we recognize the long hours law enforcement officers dedicate to their jobs,"* **said LENSEC CEO David Crawford.** *"We are happy to provide an opportunity for everyone to share ideas in a relaxed setting, and hopefully, have a little fun."*

*"LENSEC has been a committed conference partner for many years, as well as a security partner with many of our members,"* **said Chief John W. Page, president of the association.** *"We truly appreciate LENSEC hosting an event in honor of the professionals who work tirelessly behind the scenes to protect schools and communities."*

LENSEC is also exhibiting at the conference, which includes representatives from public and private school districts, campus security departments, and municipal and county law enforcement agencies.

This fall, LENSEC will debut the next generation of leading-edge security software. Perspective video management software (VMS) is a rich Internet application, which integrates the Microsoft Silverlight development platform in a completely web-enabled interface. As always, LENSEC clients and first responders, including police and Homeland Security, can access real-time video via secure IP address with username and password. This new application also delivers power and functionality previously available only with software loaded on each user's personal computer.

### About LENSEC

Founded in 1998 and based in Houston, LENSEC is a premier provider of enterprise-wide, IP-based video surveillance solutions to Federal, State, Local Government and education clients, ports and transportation authorities, as well as industrial and retail complexes, with more than 2,000 installations in 30 states across the nation. LENSEC's Perspective VMS, a proprietary suite of software applications, enables effective, remote situational awareness and security management of facilities while enabling real-time collaboration with third-party agency responders during incidents. The Company's offerings provide comprehensive IP-based video surveillance management, complete installation of equipment, and on-site and off-site monitoring access and 24/7 customer service support to provide enterprise clients with a more reliable, secure, scalable and affordable multi-facility/multi-system needs-based solutions.
